

8229 Talbot Rd Edmonds pipe 411
2-205 -> outfall 7/27/2023.
Circular 42inch Ductile Iron Pipe

Railroad ballast rock entering 42-inch DIP at 93.14-feet west of Manhole 2-205.

DIP crown is approx. 9-feet below BNSF railroad tracks.

DIP has separated at a welded joint.

Barnacle growth. Pipe is regularly submerged in tidal saltwater accelerating corrosion and increases surface roughness.
